F.3. Dual Eligible Medicaid Financing & Delivery System: Overview

- As of December 2022, dual eligible enrollment was 96,060.
- Medicare covers most acute services (which may include psychiatric care), while Medicaid, the payer of last resort, covers LTSS and non-physician behavioral health services.
- Dual eligibles are mandatorily enrolled in Medicaid managed care unless they meet one of the other qualifications for FFS.
- D-SNP enrollment as of March 2024 was 75,011, D-SNP SMI enrollment was 16,525.

F.4. Dual Eligible Medicaid Financing & Delivery System: New Initiatives

- Kentucky does not have any initiatives related to dual eligibles.

G. Long-Term Services & Supports Financing & Service Delivery System

G.1. LTSS Financing & Service Delivery System

- Kentucky does not operate a managed long-term services and supports system. All beneficiaries in need of LTSS are enrolled in FFS.

H.4. Behavioral Health Safety-Net Delivery System

- Kentucky Revised Statutes 210 (KRS 210) established 14 regional boards, called Boards for Mental Health or Individuals With an Intellectual Disability (MHID), to provide mental health, addiction disorder, and developmental disability services to uninsured populations.
- MHID boards are private, non-profit organizations, which serve residents of designated multi-county regions through community mental health centers (CMHCs).
- CMHC services include the following:
 - Inpatient services
 - Outpatient services
 - Therapeutic rehabilitation services
 - Emergency services
- CMHCs operate through a combination of state, local, and federal funds, and accept both Medicaid and sliding-scale fees as payment.

I.2. Glossary Of Terms

Word	Abbreviation	Definition
Alternative Benefit Plan	ABP	State designed benefit package for the Medicaid expansion population (childless adults with income below 138% of the FPL). The benefit package must include the ten essential benefits as laid out in the PPACA. The Medicaid expansion population deemed medically frail (including those with SMI) are exempt from receiving benefits through the ABP.
Accountable Care Organizations	ACO	ACOs are groups of provider organizations—such as physicians and hospital systems—that form an agreement to coordinate care for a set group of individuals. If the ACO delivers high quality care—measured through performance metrics—and lowers the cost of providing care against a baseline, then the organization receives a portion of the savings generated. ACOs can exist alongside all payment structures (fee-for-service and managed care delivery systems) and payers (Medicare, Medicaid, commercial).
Administrative Services Organization	ASO	An arrangement in which an organization hires a third party to deliver administrative services to the organization, such as claims processing and billing. The ASO is not at-risk.
Capitation		A set amount of money paid per enrollee per month to a health care entity to cover the cost of health care services. Capitation can cover the cost of all health care services or subset of services, such as care coordination or home- and community-based services.
Carve-out		A carve-out is a Medicaid managed care financing model where some portion of Medicaid benefits—dental services, pharmacy services, behavioral health services, etc.—are separately managed and/or financed. Carve-out services can be financed on an at-risk basis by another organization or retained by the state Medicaid agency on a fee-for-service basis.
Certified Community Behavioral Health Clinic	CCBHC	Behavioral health clinics specially certified in a demonstration established by section 223 of the Protecting Access to Medicare Act of 2014. The clinics are designed to provide community-based mental health and addiction treatment services, to advance the integration of behavioral health with physical health care, and to provide care coordination across the full spectrum of health services.

I.2. Glossary Of Terms

Word	Abbreviation	Definition
Community Mental Health Center	CMHC	An organization that can demonstrate that it is actively providing all services in section 1913(c)(l) of the Public Health Services Act, including a.) Outpatient services, including specialized outpatient services for children, the elderly, individuals who are chronically mentally ill, and residents of the CMHC’s mental health service area who have been discharged from inpatient treatment at a mental health facility; b.) 24 hour-a-day emergency care services; c.) Day treatment, or other partial hospitalization services, or psychosocial rehabilitation services; and d.) Screening for patients being considered for admission to state mental health facilities to determine the appropriateness of such admission. Additionally, the organization must meet the specifications for the state where it provides services.
Dual Eligible		An individual who is eligible for Medicare (Part A and B) and Medicaid. Medicare serves as the individual's primary insurance, and Medicaid acts as a supplement. Dual eligibles are sometimes referred to as Medicare-Medicaid enrollees (MMEs).
Federal Poverty Level	FPL	The U.S. Department of Health and Human Services sets a standard level of income that is used to determine eligibility for services and benefits, including Medicaid. In 2024, the FPL is \$14,580 for an individual and \$30, 000 for a family of four.
Fee-For-Service	FFS	A system where the payer, in this case Medicaid, contracts directly with provider organizations and pays for providing care on a unit by unit basis. Health plans may also reimburse provider organizations on a FFS basis meaning they pay for each unit of care or test.
Health Home		A “whole person” care coordination model that specifically targets populations with chronic conditions including those with SMI. Health homes provide six essential functions: 1.) Comprehensive care management; 2.) Care coordination and health promotion; 3.) Comprehensive transitional care from inpatient to other settings, including appropriate follow-up; 4.) Individual and family support; 5.) Referral to community and social support services; 6.) Use of health information technology to link services. Health homes were originally developed as a Medicaid program, but have been adopted by other payers. For a state to have an official health home program they must have an approved state plan amendment.

I.2. Glossary Of Terms

Word	Abbreviation	Definition
Health Insurance Marketplace	HIM	Created by the PPACA, the health insurance marketplace is an online platform where individuals and small businesses can purchase health insurance. The federal government subsidizes coverage purchased on the marketplace through premium tax credits for individuals with income up to 400% of the FPL.
Home- & Community-Based Services	HCBS	Long-term services and supports provided in the home or community in order to avoid institutionalization. Traditionally provided through 1915(c) waivers, HCBS services are usually limited to specific populations and a specific number of people. HCBS services include skilled nursing care, personnel care services, assistance with activities of daily living, and custodial care.
Institutions For Mental Disease	IMD	A hospital, nursing facility, or other institution of more than 16 beds that is primarily engaged in providing diagnosis, treatment, or care of persons with mental diseases, including addiction. Federal financial participation is available for Medicaid IMD services for individuals under the age of 21 and age 65 and over. In recent years, CMS has relaxed the rules prohibiting payments in IMDs for individuals age 21-64. Medicaid health plans may provide up to 15 days of IMD services per month in lieu of state plan services if medically appropriate, cost effective, and consented to by the individual. Additionally, states may be granted a 1115 waiver authority to allow individuals to receive addiction and mental health treatment in IMDs.
Long-Term Services & Supports	LTSS	Services provided in the home, community, or institutional setting to those who experience difficulty living independently and completing activities of daily living as a result of cognitive disabilities, physical impairments, disabling chronic conditions, and/or age.
Managed Care		A health care delivery and financing system designed to manage cost, utilization, and quality. In Medicaid, states generally implement managed care through contracts with health plans, which provide a limited set of benefits to enrollees through a capitated or per person per month (PMPM) rate. The health plans generally assumes full-risk for the cost of treatment, and therefore contracts with a network of provider organizations to provide care at the most efficient rate possible while still maintaining member health.

I.2. Glossary Of Terms

Word	Abbreviation	Definition
Medicaid		Medicaid is a joint federal-state program that provides health coverage to economically disadvantaged populations, such as low-income adults, children, and aged, blind, and disabled (ABD) individuals. States establish their own eligibility standards, benefit packages, provider payment policies, and administrative structures under broad federal guidelines. Financing is a shared responsibility of the federal government and the states.
Medicaid Waiver		Granted by CMS, waivers allow states to make temporary changes to their Medicaid program in order to test out new ways to deliver health coverage.
Medicaid Waiver Section 1115	1115 waiver	Known as research and demonstration waivers, states can apply for program flexibility to test new or existing approaches to financing and delivering Medicaid and CHIP.
Medicaid Waiver Section 1915(b)	1915(b) waiver	States can apply for waivers to provide services through managed care delivery systems, or otherwise limit an individual's choice of health plan or provider organization.
Medicaid Waiver Section 1915(c)	1915(c) waiver	States can apply for waivers to provide long-term care services in home- and community-based settings, rather than institutional settings.
Medical Home		A medical home is not a physical place, but a model for care coordination. Medical homes provide primary care services, care coordination, enhanced access to care, and care that is culturally and linguistically appropriate. Medical homes exist across multiple payers.
Medicare		Federal health insurance for individuals over the age of 65, individuals with certain disabilities, and individuals with end stage renal disease. Medicare covers most acute care services (which may include psychiatric care), but does not cover LTSS or non-physician behavioral health services.
Medicare Advantage	MA	Medicare Part C - also known as Medicare Advantage - is a program which allows individuals who are eligible for Medicare Parts A and B to elect a private health plan to provide their Medicare coverage. The federal government pays the plan's premiums up to a set level, and individuals are responsible for the difference.

I.2. Glossary Of Terms

Word	Abbreviation	Definition
Medicare Advantage Special Needs Plan	SNP	A special type of Medicare Advantage plan that is designed to provide targeted coordinated care to individuals who are a) institutionalized; b) dual eligible; and/or c) meet the severe chronic disabled conditions set forth by CMS. Plans emphasize improved care primarily through continuity of care and care coordination.
Medicare Part A		Hospital Insurance: Covers hospital, skilled nursing care, hospice, and home health care for most eligible individuals at no cost. Financed through payroll tax and deductibles, copayments are only charged if a stay becomes long-term.
Medicare Part B		Supplementary Medical Insurance: Covers most outpatient services, and consumers pay a premium based on income level.
Medicare Part C		Medicare Part C - also known as Medicare Advantage - is a program which allows individuals who are eligible for Medicare Parts A and B to elect a private health plan to provide their Medicare coverage. The federal government pays the plan's premiums up to a set level, and individuals are responsible for the difference.
Medicare Part D		Outpatient Prescription Drug Benefit: Private plans contract with Medicare to provide coverage for prescription drugs. Most consumers pay premiums based on their income.
Metropolitan Statistical Area	MSA	An urbanized area with a population of at least 50,000 plus adjacent territory that has a high degree of social and economic integration as measured by commuting ties.
Patient-Centered Medical Home	PCMH	See Medical Home.
Patient Protection & Affordable Care Act	PPACA or ACA	U.S. health care reform signed into law in 2010. The legislation regulates certain aspects of private and public health insurance programs and authorizes an individual mandate to secure essential health coverage, premium tax credits for the purchase of private health insurance, and increased insurance coverage of preexisting conditions. In 2012 the Supreme Court ruled that state participation is optional for provisions of the law expanding Medicaid coverage to adults ages 18 to 64 with incomes under 138% of the FPL. In 2017, Congress repealed the tax penalties associated with the individual mandate essentially ending the mandate.

I.2. Glossary Of Terms

Word	Abbreviation	Definition
Primary Care Case Management	PCCM	A health care delivery system model with limited utilization and cost control. Under the PCCM model, Medicaid enrollees choose a primary care physician who acts as a gatekeeper for more intensive services. The primary care physician generally receives a per person per month (PMPM) fee for care coordination, and is reimbursed fee-for-service for all medical services provided.
Program Of All Inclusive Care For The Elderly	PACE	PACE serves populations over the age of 55 who are eligible for skilled nursing home care by utilizing a comprehensive delivery system of social, medical, and long-term care services to keep enrollees in the community for as long as possible. PACE is an optional state Medicaid program, and may only be available in certain states, or regions within states.
Serious Mental Illness	SMI	A mental, behavioral, or emotional disorder that lasts for a sufficient duration of time and causes impairment of major life activities. Serious mental illnesses include major depression, schizophrenia, bipolar disorder, obsessive compulsive disorder (OCD), panic disorder, post traumatic stress disorder (PTSD), and borderline personality disorder.
Supported Employment		Provides services and supports to help individuals with disabilities become employed in an integrated or competitive work environment, and retain that employment.
Supported Housing		Housing provided for as long as needed at little or no cost to individuals with mental illness, or other vulnerable populations who are homeless or at-risk for homelessness. Mental health and social services are offered to participants, but are not a condition for participation in the program. The goal is to allow individuals to live as self-sufficient, independent lives as possible.
Value-Based Reimbursement	VBR	Reimbursement model in which payers financially reward or penalize health care provider organizations for performance on quality and cost of care. VBR payment mechanisms include P4P; capitation; shared savings models; shared risk models; and payments based on clinically-defined episodes, called episodes of care or bundled payments.
